

ALBUM-IN-A -BOX

Cartridge: George

Materials: 4 - 12 x 12 cardstock

1 - 12 x 12 Pattern paper

Ribbon for top of inside pages.

Cut 2 pieces for the box

Score at $\frac{3}{4}$ " on all side of the wider part. The cut for the corners is at $\frac{3}{4}$ "

Embellish front of box with your choice of embellishments BEFORE you glue.

Score at the bottom of the wider part and fold to the inside, glue.

Put the box together with the front on the outside of the 2 pieces.

Score and fold the spine at $\frac{1}{2}$ " intervals.

On 2 of the inside pages, glue a patterned cutout.

Glue one of them to the outside of the first fold of the spine so that the spine is not showing.

Do the same with the other and put on the last fold of the spine again with the spine not showing.

On the 3 remaining inside pages, attach the ribbon at intervals (I used eyelets to thread the ribbon, but you can use whatever you want to attach the ribbon.

Now glue them to the rest of the spines, at the back of each.

Have fun :-)
